

ORTHOLOC®

Polyaxial Calcaneal Fracture System

The comprehensive solution to Calcaneal fracture fixation

Fixed angle and 15°
polyaxial locking

- **Comprehensive:** One system providing multiple implant designs and screw options.
- **Adaptable:** ORTHOLOC® polyaxial locking technology and simple *in situ* plate contouring for surgical flexibility and speed.
- **Strong:** Low-profile titanium locking plates for surgical strength and holding power.

*DARCO® Headed Screws not cleared for use through calcaneal plates.
